

QC Solutions

The Complete PET Quality Control Service

Experts in implementing PET QC laboratories in a fast, cost effective and hassle free manner

LabLogic offers off-the-shelf and customised solutions which address whatever requirements you may have. We ensure your lab is fit for purpose, with hassle-free implementation, using market leading solutions, that are backed by global warranty.

Full Project Management

Our team of experienced staff will fully project manage the whole process using tried and tested methods.

Having installed QC labs in many of the world's leading facilities, you can trust us, we know what it takes deliver a successful project.

Cost and time efficiency

Having one company supply all the equipment within the QC laboratory offers many benefits, none more so than a significant cost and time savings.

Optimise your workflow and compliance

At LabLogic we understand the need for efficient workflow processes and regulatory compliance.

We design lab layouts and utilise proven solutions to help you achieve this fundamental goal.

On the product front, Laura for PET, radiochromatography software offers a single point of control software for all related instruments.

"Laura's single interface to all equipment has been a great help in our daily work, not to mention the regulatory aspects."

In our inspection a few weeks ago, when it came to software controlling QC equipment, the validation documentation was enough to convince them straight away."

Antti Mali, Kuopio University Hospital

- ✓ Leading manufacturer of QC instruments and software
- ✓ Agreements with all major suppliers
- ✓ Proven track record
- ✓ Data Integrity
- ✓ Team of industry experts
- ✓ Full after sales support
- ✓ Support with implementing GMP

What we offer

1. Consultation

At the planning stage, LabLogic offer comprehensive, in depth consultation service to ensure the lab will be equipped as required.

2. Supply

Once the list of equipment needed is agreed, LabLogic will take full control of the supply process.

For equipment that LabLogic don't manufacture, we have agreements with all the major suppliers and manufacturers, which makes supply significantly quicker and cost effective.

3. Design

LabLogic will design the laboratory to your facilities needs, in line with the scope of supply.

We will advise on an ergonomic layouts of all utilities and equipment to improve productivity.

4. Installation

The whole installation processes is executed by experienced engineers and software developers, using tried and tested methods to ensure a trouble-free experience.

5. Training

From introductory training during installation to in-depth, fully certified training courses, you can be sure that you are getting the most out of your system.

6. Validation / Qualification

Our Validation Service enables you to implement and get maximum value from your investments as soon as possible.

We work as a partner with your Quality Manager, System Manager and users to provide a tailored Validation Plan suited to your needs.

7. GMP

Our range of consultancy and training services, as well as tried and tested document templates have been created to simplify the implementation of GMP in your facility.

8. Service & Support

Our all-inclusive service and support contracts offer ultimate peace of mind. We pro-actively schedule preventative maintenance (PM) visits and will take care of all repairs at no additional cost. Customers on a support contract are also entitled to free software releases within a specified version.

Service and Support

Users of our systems can benefit from our comprehensive, fully inclusive service and support.

We can give reassurance that if things go wrong or you need expert advice, help is only an e-mail or phone call away.

Validation Services

Our Validation Service enables you to implement and get maximum value from your investments as soon as possible.

We work as a partner with your Quality Manager, System Manager and users to provide a tailored Validation Plan, suited to your needs. Our Validation Specialists have years of experience in GLP system validation, detailed knowledge of our systems, together with other industry standard systems to help you meet company and regulatory requirements.

Training

LabLogic can provide a variety of training courses and workshops to help you get the most out of your instruments and software.

All training is performed by our expert Product and Support Specialists who have many years experience in the development and use of the instruments and software.

Certificates can be provided to complement your internal GLP training records.
